EDUCATION

University School of Information, Communication and Technology, GGSIPU <i>Bachelors in Technology, Computer Science</i>	Dec 2021-Present CGPA:8.520
Mothers Global School <i>XII-PCM</i>	2019-2020 93.8%

TECHNICAL SKILLS

Languages: C++ (solved **over 1200 questions** in data structures and algorithms on Leetcode, GFG and others), Java

Frontend: HTML, CSS, JavaScript, JQuery, SCSS, React, Redux, Next, TypeScript

Backend: Node.js, Express.js, SQL, MongoDB, REST APIs, JWT, Firebase

EXPERIENCE

React Developer <i>Zivaka LLP</i>	Aug 2023 - Oct 2023
<ul style="list-style-type: none">Developed the frontend for a software portal with API integration, featuring multi-component utility pages, a custom event calendar, and visual aids like graphs and charts for actionable insights.Implemented role-based access control for regulated data access, attracting over 1,000 daily visitors and doubling operational efficiency, driving business growth.Optimized employee onboarding with a responsive suite of 7 electronic forms logging details into a centralized table, simplifying form creation, enhancing accessibility, and ensuring secure data storage.	
Full Stack Developer <i>USS ACM</i>	Sept 2022 - Aug 2023
<ul style="list-style-type: none">Built a custom member portal for 200+ users using the MERN stack, featuring defined profiles and a detailed project section to increase user engagement. Achieved through CRUD operations and data structure principles.Created 7 internal forms, replacing manual Google form creation for announcements, team management and more. Enabled instant use of prebuilt forms, reducing effort and minimizing creation time.	

SELECTED PROJECTS

Quizzzy <i>Reactjs, Node.js, Express.js, MongoDB, Tailwind CSS, Github</i>	TruecoderSri/Quizzzy
<ul style="list-style-type: none">Engineered a quiz platform to create, manage, filter, and play from a diverse array of user-generated quizzes, testing knowledge across various domains in a gamified environment with a quiz leaderboard.Implemented accessibility features such as text-to-speech, keyboard navigation and ARIA-labels.Built a CRUD API architecture with 4 routes for users, profile, question, and quizzes.	
Weatherify <i>Next.js, TypeScript, Tailwind CSS, Stepzen GraphQL, Github</i>	TruecoderSri/Weatherify
<ul style="list-style-type: none">Designed an AI-powered weather application integrating Stepzen and GraphQL for data fetching; delivers precise climate insights in 1,000+ global cities with a focus on personalized user experience.Delivered detailed city climate data, including temperature, wind speed, and graphical weather analysis. Features UV-index levels and personalized weather advice based on real-time data and user location.	
Dermacare <i>Reactjs, Node.js, Express.js, Cloudinary, SCSS, Python, Github</i>	TruecoderSri/Dermacare
<ul style="list-style-type: none">Constructed a skin disease detection platform using a fine-tuned ML model trained on 19,000+ images. Users upload skin images to receive detailed reports on detected diseases, remedies, and nearby doctors.Equipped with a comprehensive search engine for skin-related diseases, offering extensive health information.	

ACHIEVEMENTS

Hackathon	Sept 2023
<ul style="list-style-type: none">Selected for nationwide Smart India Hackathon 2023 for a medical domain project. Created a platform to identify skin diseases from uploaded images, powered by a machine learning algorithm.
